## Corporate Governance and Public Companies

At Mitchell Williams, we draw on decades of experience to help clients understand, manage and—ultimately—minimize the risks that are increasingly present in the corporate boardroom.

We offer insight and seasoned advice on a broad range of governance matters including Sarbanes-Oxley Act and Dodd-Frank Act compliance and counsel boards of directors and independent board committees on compliance with SEC and stock exchange requirements.

With a wide knowledge of corporate best practices, we help clients meet their disclosure obligations and other duties as well as handle the executive compensation, employee policy, shareholder relations and similar issues that are common to corporate management. And, when the extraordinary happens, we advise boards of directors and executives on all facets of corporate mergers and acquisitions—from due diligence and fiduciary responsibilities to matters of indemnification and D&O insurance.
