American Chemistry Council Announcement/Presentation Regarding U.S. Chemical Industry Investment In Natural Gas/Shale

Arkansas Environmental, Energy, and Water Law Blog

04/15/2016

The American Chemistry Council ("ACC") issued a news release noting that the United States Chemical Industry investment in natural gas and natural gas liquids from shale formations has reached \$164 billion.

The announcement references 264 projects (i.e., new facilities, expansions and factory restarts) of which 40% are completed or underway and 55% are in the planning phase.

The investment figures were presented at a Hudson Institute event titled *America's Future Natural Gas Economy: Promoting the Next Energy Breakthrough*. ACC Senior Director of Energy Policy Owen Kean undertook a presentation titled *Natural Gas and American Manufacturing* Hudson Institute.
