Whole Effluent Toxicity (WET) in NPDES Permits: Pat Downey (FTN Associates, Ltd.) Arkansas Water Works & Water Environment Conference Presentation

Arkansas Environmental, Energy, and Water Law Blog

05/24/2016

Pat Downey of FTN Associates, Ltd. undertook a presentation at the Arkansas Water Works & Water Environment Conference titled *WET in NPDES Permits ("Presentation")*.

The *Presentation* addressed a variety of issues associated with whole effluent toxicity testing.

The issues addressed in the *Presentation* included:

- WET Monitoring Requirements
- Test Failure
- WET Testing (describing the process)
- TREs (including TRE Trigger Flow Chart)
- TRE – general approach
- Pathogen Interference
- Most Frequent TRE Results
- WET Limits
- RP Determination
- Implementation of Sublethal WET Limit
