

# Industrial Energy Efficiency Workshop: Jackson, Mississippi-August 31st

## Arkansas Environmental, Energy, and Water Law Blog

08/10/2016

An *Industrial Energy Efficiency Workshop* ("Workshop") is scheduled in Jackson, Mississippi for August 31<sup>st</sup>.

The Workshop is being held by the Mississippi Department of Environmental Quality ("MDEQ") in partnership with innovateMEP-Mississippi and the Mississippi Manufacturers Association.

MDEQ states that the Workshop is designed to provide attendees the knowledge to:

- (1.) Evaluate their energy consumption patterns
- (2.) Seek opportunities for increasing the efficiency of their operations

Target sectors for the workshop include:

- Industrial manufacturers
- Food processors

The topics covered will include:

- Building a culture of energy efficiency
- Major components covered:
  - Lighting systems
  - Chiller optimization
  - Variable frequency drives
  - Compressed air leaks

Possible attendees are suggested to include:

- Plant managers
- Operations managers
- Facilities managers
- Energy efficiency professionals
- Business and policy decision makers

Instructors for the program include:

- Sumesh Arora, Ph.D.
- Wally Majors, CEM, CEA
- Brett Rasmussen, PE, CEM

The cost of the program is \$25 (lunch included).
