Arkansas Natural Resources Commission Solicitation: Projects, Programs, Initiatives and Activities Related to Water Quality Improvement/Nonpoint Source Pollution Reduction, Control or Abatement

10/09/2017

The Arkansas Natural Resources Commission (“ANRC”) states that it is, in cooperation with the University of Arkansas Division of Agriculture Public Policy Center, soliciting information:

. . . of Water Quality Activities (WQAs) that have maintained or enhanced water quality, or reduced, controlled or abated nonpoint source pollution.

ANRC states that the WQAs may originate from state and federal agencies, non-governmental organizations, conservation districts, or other groups around the state.

The information is being requested for the period of October 1, 2016 through September 30, 2017.

The ANRC is utilizing a “Snap Shot Reporting Document” for those submitting information. The document asks for specific information but also provides the opportunity to incorporate additional discussion to describe the WQAs.

The document must be submitted by December 1, 2017.

ANRC 319 staff contacts are provided in the event additional information is needed to complete the document.
