**Subject:** BWA August Speaker Series

## USGS StreamStats Program: A U.S. Geological Survey Web Map Application for Basin Characteristics and Streamflow Statistics

**Thursday, August 31 from 11:30 am to 1 pm**

**- Free Lunch Included -**

Washington County Cooperative Extension  
2536 N. McConnell Ave  
Fayetteville, AR 72704

**Northwest Arkansas' cities** and communities large and small can benefit from the Beaver Watershed Alliance speaker series *Investing in Water Supply Protection in NWA*.

This program is being provided to help regional stakeholders, including those in conservation, education, water utilities, technical and science, business, agriculture, recreation, local government groups and land ownership, learn more about a valuable tool that is useful for making decisions that involve infrastructure, streams, and associated issues with flooding, in light of the wet spring and summer.

The presentation will feature Dan Wagner, Hydrologist, with the U.S. Geological Survey, Lower

Mississippi-Gulf Water Science Center, located in Fayetteville, Arkansas. Dan's presentation will discuss the StreamStats program which allows users to easily obtain streamflow statistics, basin characteristics, and descriptive information to estimate peak flows and helps in planning for and protecting water quality and built infrastructure.

Since Beaver Lake supplies 1 in 7 or nearly a half million people with clean drinking water, provides over forty million tourism and recreation dollars for the local economy, and is the key factor to a successful future in the region, BWA developed this quarterly speaker series to share the rationale behind investing in watershed protection activities today that can benefit our entire region tomorrow. The series name, *Investing in Water Supply Protection in NWA: It's good for business, agriculture, recreation, nature, and you*, reflects these goals.

**This is a free program, and lunch is included. Please RSVP by calling BWA at 750-8007 or email at [info@beaverwatershedalliance.org](mailto:info@beaverwatershedalliance.org).**

BWA is a non-profit organization focused on maintaining high quality drinking water in Beaver Lake and improving water quality within the Beaver Lake Watershed.

(479) 750-8007 or [info@beaverwatershedalliance.org](mailto:info@beaverwatershedalliance.org)

## About Beaver Watershed Alliance

BWA was formed in 2011 to proactively protect, maintain, and enhance the water quality of Beaver Lake and the integrity of its watershed through outreach and education, voluntary best management practice implementation, and scientific investigation. BWA represents a diverse stakeholder group from conservation, education, water utilities, technical and science, agriculture, recreation, business, and local government groups working together for the goal of clean water.

Your financial contribution will help BWA fulfill our mission to proactively protect, maintain, and enhance the water quality of Beaver Lake and the integrity of its watershed through outreach and education, voluntary best management practice implementation, and scientific investigation.
