# Carroll County Solid Waste Authority Request to Become an Arkansas Regional Solid Waste District: Arkansas Pollution Control and Ecology Commission Decision

10/31/2019

The Carroll County Solid Waste Authority (“Authority”) previously submitted a Petition to the Arkansas Pollution Control and Ecology Commission (“Commission”) to be designated the Carroll County Solid Waste District (see previous post [here](#)).

The Receiver (Geoffrey B. Treece) for the Ozark Mountain Solid Waste District (“District”) petitioned to intervene in the proceedings before the Commission and opposed the Petition (see previous post [here](#)).

The Petition was submitted pursuant to Ark. Code. Ann. 8-6-707 which provides the Commission the Authority to designate a county or counties within each district or counties within two or more districts as a new regional solid waste management district. Carroll County is currently a part of the Ozark Mountain Solid Waste District.

Commission Administrative Law Judge (“ALJ”) Charles Moulton previously issued a Recommended Decision granting the Petition (see previous post [here](#)).

The Commission at its October 25th meeting upheld the ALJ’s Decision granting the Petition.
