10/26/2020

The Oklahoma Department of Environmental Quality (“ODEQ”) established an online operator training platform providing training for the state’s water and wastewater operators.

ODEQ describes the platform as a:

. . . no-cost web-based solution for acquiring Professional Development Hours required for certification renewal.

ODEQ notes its recognition of the impact of COVID-19 on potential training opportunities. As a result, it established the online training platform and extended the deadline for meeting annual Professional Development Hours.
