Electric Vehicle Charging Stations/Funding Programs: Arkansas Department of Energy & Environment Distributes Webinar Slides/Guidance Documents

02/11/2022

The Arkansas Department of Energy & Environment (“ADEE”) Energy Office is distributing a slide deck and guidance documents associated with its electric vehicle charging stations funding programs.

ADEE had previously issued a January 24th news release referencing two electric vehicle charging stations funding programs that include:

- Level 2 Electric Vehicle Supply Equipment Program (providing rebates for the installation of Level 2 electric vehicle charging stations/described as being capable of fully charging electric vehicles in eight hours or less using a 240 volt output)
- 150-Kilowatt DC Fast Charge Stations (charging stations described as being capable of charging electric vehicles in as little as 30 minutes)

ADEE is making available webinar slides and guidance documents for both programs.

A link to the documents can be found [here](#).
