01/05/2024

The Arkansas Water Resources Center (“AWRC”) has issued a notice that it is extending the deadline for pre-proposals for research projects that address water needs in Arkansas.

The deadline has been extended to January 22, 2024, by 5:00 PM.

The funding opportunity is provided as part of the U.S. Geological Survey (“USGS”) 104(b) program as instituted by the Water Resources Act of 1984.

The AWRC announcement notes that funding is conditioned upon USGS funds being provided. However, the organization further states that funding is anticipated as follows:

- Faculty research up to \$35,000
- Student research up to \$10,000

Eligible applicants are stated to include:

- Any faculty member or affiliate at a college or university in Arkansas
- Students with a faculty advisor

Federal employees are not eligible as a principal investigator but are allowed to collaborate with faculty as a co-investigator.

The AWRC notice which contains a link to the full request for the pre-proposals, can be found [here](#).
