08/28/2024

American Clean Power (“ACP”) (a trade association) has issued an August 2024 Report titled:

Clean Energy Investing in America. (“Report”).

ACP describes itself as the:

...leading voice of today’s multi-tech clean energy industry, representing over 800 energy storage, wind, utility-scale solar, clean hydrogen, and transmission companies.

Statistics found in the Report include:

- Announcement of 500 billion dollars in clean energy investment at 160 new manufacturing facilities/facility expansions.
- 100,000 related manufacturing jobs announced.
- 460,000 Americans currently employed by the clean energy industries.
- 300 GW of clean power capacity announced.
- 55 GW of clean power capacity installed.

The Report includes a map of the United States identifying clean energy projects that have been built and breaks them down into the following categories:

- Solar.
- Energy storage.
- Wind.
- Offshore wind.

Investments are also broken down by the same categories.

The Report also lists online and operating clean energy facilities by state. A similar list is provided for clean energy facilities that are under development and announced.
