09/13/2024

Terracon has acquired Flat Earth Archeology of Arkansas ("Flat Earth").

Flat Earth is stated to provide archaeology and cultural resources management and compliance services to clients in Arkansas and the surrounding region.

Flat Earth is a Firm describing itself as offering:

...professional resource services for federal agencies, tribal nations, state agencies, municipal governments, and companies from the fields of telecommunications, real estate, development, engineering, transportation, oil and gas, mining, water, power, environmental consulting, wetland rehabilitation, finance, and agriculture.

Flat Earth's corporate office is in Cabot, Arkansas.

Terracon describes itself as a Consulting Engineering Firm specializing in environmental, facilities geotechnical and materials services and has more than 6,000 employees in more than 175 locations which include offices in Little Rock and Rogers, Arkansas.

Terracon had previously acquired in 2023 Pollution Management, Inc. and in 2024 Harbor Environmental, Inc. Both of these Firms supply a variety of environmental and engineering services. A link to posts about these two transactions can be found below:
