Innovative Mitigation Partnerships for Asphalt and Concrete Technologies Act: U.S. House of Representatives Legislation Introduced Addressing Cement/Concrete/Asphalt Production

03/19/2025

United States Congressman Max Miller (Ohio) and Congresswoman Valerie Foushee (North Carolina) have introduced legislation titled:

Innovative Mitigation Partnerships for Asphalt and Concrete Technologies (IMPACT) Act.

The stated objective of the IMPACT Act is to:

...strengthen and enhance the competitiveness of American manufacturing by developing advanced technologies that will improve the efficiency of cement, concrete, and asphalt production.

The sponsors stated the legislation will:

- Enable industry in the United States Department of Energy to work collaboratively on fundamental research that will enhance existing production methods and unlock new innovative techniques; and,
- Enable the United States Department of Energy, in consultation with other federal agencies, to offer technical assistance to entities seeking to promote the commercial application of low-emissions cement, concrete, and asphalt.

A copy of the IMPACT Act can be downloaded [here](#).
