The United States Occupation Safety and Health Administration (“OSHA”) issued citations for alleged violations by a methane reformer plant in Corpus Christi, Texas.

The OSHA News Release identifies the company as Air Liquide Large Industries US LP (“ALLI”).

ALLI is cited for allegedly:

- Failing to perform air monitoring to assess employee exposure to carbon monoxide gas
- Failing to protect workers from a potentially hazardous atmosphere created by inadequately maintained valves found leaking within the pressure swing adsorption skid

OSHA proposes fines totaling \$77,000.
