I understand that Kevin White has been named the Associate Director of the Arkansas Department of Environmental Quality ("ADEQ") Office of Land Resources.

Mr. White assumes that position as of July 17th.

Mr. White currently serves as ADEQ's Director of Enterprise Services. I also understand that he has over 13 years of managerial and project-management experience at ADEQ.

ADEQ describes the Enterprise Services section's role as helping Arkansas businesses comply with environmental regulations and the reduction or elimination of emissions and wastes generated. The activities of the section include administration of the Arkansas Recycling Equipment Tax Credit Program, business regulatory assistance, P2 Program, and Arkansas Marketing Board for Recyclables.
