

BEAVER WATERSHED ALLIANCE

Our Mission The Alliance was formed in 2011 to proactively protect, maintain, and enhance the water quality of Beaver Lake and the integrity of its watershed.

December Forestry Workshop

What does a healthy forest look like? How can we manage our woods for water quality, wildlife, and more? There's still time to RSVP for the upcoming landowner workshop focused on forestry. Our guest speaker, Michael Mitchell, is an Arkansas Registered Forester with Devereux & Associates LLC. Mr. Mitchell has decades of experience working with landowners and forest management in NW Arkansas. He will be leading a forest walk and talk where participants can ask questions and see real-world examples of when and where forestry practices are needed and the logistics of getting practices implemented.

If you live in the War Eagle watershed, special funding is available to you through the Regional Conservation Partnership Program. We will help you learn about this program and assist with the paperwork and the signup process.

Forestry practices, such as prescribed burning and timber thinning, can greatly improve overall forest health and generate income through timber sales and cost-share programs. Click here to read more.
